Swann-Morton®

ONE OF THE WORLD'S LEADING SURGICAL BLADE MANUFACTURERS

The single use blade remover, retractable safety scalpels, including a popular stitch cutter and the KLEEN blade management system are now joined by a Clicksmart range featuring BladeFlask and BladeCassette offering simpler safer ways of removing and disposing of contaminated blades after use.

In conjunction with Improve International will be introducing the new "BladeFlask EVO", a single handed blade removal

unit that can be conveniently located within each practice to safely remove and store up to 100 contaminated blades from all types of surgical handles whether standard, long, thick or rounded. In addition, there is "SnapIT" a multi-use ampoule opener helping in the reduction of unacceptable sharps injury rates associated with ampoules being opened by hand and the painful and dangerous sharps injuries inflicted.
